State of Maryland DHMH
Pharmacy Management System RFP – Solicitation No. DHMH/OPASS 17-17110
Response to Offeror Questions #5
July 13, 2016

On page 46 of the RFP, item "F", it requests the "Offeror's eMM number". Is this the same as the Vendor ID #?

Yes, the Vendor ID # on the eMaryland Marketplace is the same as the eMM number.

On the Offeror Info Tab of the Pricing Attachment, what is the difference between Offeror Name and Company Name? Is there a difference between the two or should the Company Name be listed twice?

Please list the Company Name twice.

On the Required SW Tab of the Pricing Attachment, are we supposed to lump all four hospitals together for the required software and just list the different items? For example, one item would be the license for Module A for each pharmacy and then another item would be Module B for each location.

You can lump all four pharmacies into one price per software module.

On the Services Tab of the Pricing Attachment, please define "Role" and "Services".

The "Role" is the title of the team member and the "Services" are the specific duties they will be performing on this project. In some cases, these two items may be interchangeable. Please complete the chart in a way that makes sense for your team and clearly identifies what services will be provided and the rate for those services.
